13. ABSTRACT (Maximum 200 words) The attached two-page report lists the sixty-six scholarships paid. The report is organized alphabetically by student last name. The grant award of \$134,000 accounted for sixty-seven scholarships. The discrepancy is the scholarship payable to Albert Wang. Albert completed four years of undergraduate work in three years and therefore did not need the final year's payment of his scholarship. The \$2,000 balance will be applied as a carry over toward 1998 scholarship payments (authorized by the program officer). The funds reside in a non-interest bearing account.

Naval Science Award Program Scholarships
Grant No. N00014-97-1-0975

1997 Annual Report

In 1997, the Academy of Applied Science, Concord, New Hampshire, began administration of the Naval Science Award Program Scholarships under a grant with the Office of Naval Research, Arlington, Virginia. A total grant of \$134,000.00 was awarded for the period 1 July 1997 through 31 December 1997.

Administration. To meet the requirements of the grant and successful completion of this project, the Academy of Applied Science performed the following.

- Communicated with student recipients of the Naval Science Award Program Scholarships to verify eligibility and compliance with the terms of the scholarship agreement.
- Established a working relationship with nationwide, postsecondary institutions to facilitate an efficient and collaborative system of information exchange and financial accounting.
- Processed timely payment of sixty-six individual scholarship awards, at \$2,000 each, and distributed payment to the appropriate Financial Aid Office or Bursar's Office.
- Maintained financial records and prepared financial reports.

The Naval Science Award Program Scholarships, previously administered by the Office of Naval Research, were processed efficiently and were received in a timely manner by the individual recipient's university of enrollment. This efficient and timely processing was due to the coordinated efforts among the staff of the Academy of Applied Science; Mrs. Barbara Thurman, Project Officer, Office of Naval Research (ONR); Charlotte Luedeke, Contracting Officer, ONR; and the ONR Regional Office Boston. Many thanks go to these individuals at ONR for their support in this year of transition.

The Academy's experience in administering youth science activities, requiring interaction with both postsecondary institutions and high school students, further assured a successful transition. Many student recipients had worked previously with the Academy and expressed confidence in our administrative experience. For the universities, this transition required the establishment of new working relationships and communications to introduce the Academy and its role in the

Naval Science Award Program Scholarships. Again, the Academy's experience with the university community assured the successful coordination of the scholarship program on behalf of the Navy.

Final payments - The Naval Science Award Program Scholarships. The Academy of Applied Science processed total payments in the amount of \$132,000.00, or sixty-six individual scholarship awards at \$2,000 each. Total payments of \$134,000, or sixty-seven scholarships at \$2,000 each, were expected. However, one scholarship recipient, Albert Wang, did not require the scholarship. Albert completed his undergraduate degree in three years rather than four; therefore, the scholarship payment for a fourth and final year was not required.

A complete listing of the student recipients, university of enrollment, and scholarship amount is at Attachment 1.

Unexpended Funds and Earned Interest. Approval is requested to utilize the unexpended funds in the amount of \$2,000.00 toward administration of the 1998 Naval Science Awards Program Scholarships. This authority will be coordinated through the ONR Project Officer. No interest was earned by grant funds.

Conclusions. The Academy of Applied Science enjoyed working on this project and working with an outstanding, talented group of young people. The objectives of the Naval Science Award Program Scholarships -- to encourage the future pool of trained scientists and engineers -- are in keeping with the mission and goals of the Academy of Applied Science and its youth science programs.

U. S. Navy Science Fair Awards Grant # N00014-97-1-0975

First name	Last name	College	Paid Out 1997
Agbeli	Ameko	University of Colorado	\$2,000
Amir-Ali-Reza	Anghaie	University of Florida	\$2,000
